## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 43 has been canceled as drawn to a non-elected invention.

Authorization for this examiner's amendment was given in the Appeal Brief dated 9/30/04 by Stanley C. Spooner.

### ***Allowable Subject Matter***

Claims 27-38 and 42 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record, Ooi et al. (5,917,628) and Logan Jr. (5,204,640), do not teach an optical phase detector to detect the intensity of each of the combined optical outputs. Further, there is no teaching or motivation for the feedback means to be connected to the laser so that feedback of the electrical signals is achieved. In addition, Applicant's arguments dated 9/30/04 are persuasive (see page 9, paragraph 3 - page 11, paragraph 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
